What Is Domain Flipping?

At its core, domain flipping involves purchasing domain names at a lower price and selling them later at a higher value. This is akin to real estate flipping but transposed onto the internet. - Domain Extensions

While '.com' remains the gold standard, other extensions like '.io', '.ai', and '.co' are gaining popularity and can command higher prices in specific niches.

The combination of these factors often results in substantial profit margins, sometimes turning a single domain purchase into a six-figure sale.
