These principles serve as the foundation for detailed guidelines that govern documentation practices across the Summa Health System.

Detailed Breakdown of Section 5 Documentation Guidelines

- Documentation Content Standards

The content of clinical documentation must reflect a comprehensive picture of the patient's health status, assessment, and plan. Key elements include:

- Patient identification: Name, medical record number, date of birth, and encounter date.
- Chief complaint (CC): Clear statement of the primary reason for the visit.
- History of Present Illness (HPI): Chronological description of the patient's current condition, including onset, duration, severity, and associated symptoms.
- Past Medical History (PMH): Relevant previous diagnoses, surgeries, allergies, and medications.
- Review of Systems (ROS): Systematic review to identify additional symptoms.
- Physical Examination Findings: Objective findings, documented with sufficient detail.
- Assessment and Diagnosis: Clinical impression based on findings, with supporting rationale.
- Plan of Care: Diagnostic tests ordered, treatments prescribed, patient education, and follow-up instructions.

- Documentation Timing and Workflow

Timely documentation is critical for accuracy and legal integrity. Guidelines specify that:

- Entries should be made during the encounter or immediately afterward to minimize recall bias.
- For inpatient stays, progress notes should be updated daily.
- Emergency encounters require prompt documentation to capture urgent findings accurately.
- Delays in documentation should be justified and clearly annotated.

- Use of Electronic Health Records (EHR)

Summa emphasizes the use of standardized templates within its EHR system to promote consistency. Best practices include:
