What Is an Electrotec Halogen Oven?

Definition and Overview

An electrotec halogen oven is a type of countertop cooker that uses halogen light technology to generate heat. Unlike conventional ovens that rely on heating elements or microwave radiation, halogen ovens utilize a halogen bulb as the heating source, which produces infrared heat. This method allows for rapid cooking, even heat distribution, and reduced energy consumption.

How It Works

- **Depth:** Cuts should be deep enough (about 1/4 inch) to influence crust formation.

Tips for Perfect Scoring

- Use a very sharp blade to prevent tearing the dough uncontrollably.
- Practice your technique to ensure consistent depth and spacing.
