- Monopoly and Oligopoly: Common in segments like rail freight or urban transit, where economies of scale justify a dominant provider.
- Regulated Markets: Governments often regulate fares and entry to prevent abuse of monopoly power and ensure accessibility.

### Externalities and Market Failures

Transportation activities generate externalities?costs or benefits not reflected in market prices?that can distort optimal resource allocation.

- Negative Externalities: Pollution, noise, congestion, accidents.
- Positive Externalities: Increased accessibility, reduced travel times, economic agglomeration.

Lecture notes emphasize the importance of internalizing externalities through taxes, subsidies, or regulations to promote socially optimal outcomes.
