Minnesota's northern latitude makes it an ideal location for viewing the Northern Lights, especially during peak solar activity. Sixth grade lessons often highlight how proximity to the Arctic Circle increases the chances of witnessing this natural display. Have

there been any notable Northern Lights events in Minnesota's history that sixth graders learn about? Yes, sixth graders often learn about historic Aurora Borealis displays, such as the intense geomagnetic storm of 1989 that caused widespread auroras visible even in southern parts of Minnesota, sparking interest in space weather and Earth's magnetic environment.
