- Trade allows countries to specialize according to their comparative advantages.

- Draw a diagram showing production possibilities frontiers (PPFs).
- Emphasize the concept of mutually beneficial trade.

Chapter 4: Trade Policies and Welfare

Question: What are the welfare effects of imposing a tariff on imported goods?

Answer Overview:

- A tariff raises the domestic price of the imported good.
- Consumers face higher prices and reduced consumption.
- Domestic producers may benefit from increased sales.
- The government gains revenue from the tariff.
- Deadweight loss occurs due to reduced efficiency and lost gains from trade.
- Overall welfare may decline because the gains to producers and government are often offset by losses to consumers.
