Everyday Science Facts About Plants

The following facts highlight how plants impact our daily lives and the astonishing science behind their existence.

Fact 1: Plants Are the Earth's Oxygen Factories

- During photosynthesis, plants convert carbon dioxide and water into glucose and oxygen.
- A mature tree can produce enough oxygen for 10 people daily.
- This process accounts for about 70% of the world's oxygen production.

Fact 2: Plants Communicate Through Chemical Signals

- When under attack by pests, some plants release volatile organic compounds (VOCs).
- These VOCs can signal neighboring plants to activate their defense mechanisms.
- Example: When a tomato plant is attacked, it releases chemicals that alert nearby plants to prepare for pest invasion.

Fact 3: Some Plants Can ?Hear? and Respond to Sound
