4. Flexibility and Judgment

- Markers were encouraged to use professional judgment, especially when responses straddled

different levels.

- The scheme provided guidance on partial credit for incomplete but relevant responses.

Detailed Breakdown of Mark Scheme Components

1. Knowledge and Understanding (AO1)

- This section assessed students' grasp of economic concepts, theories, and terminology.
- Responses needed accurate definitions, explanations, and understanding of concepts such as supply and demand, market equilibrium, opportunity cost, elasticity, etc.
- The mark scheme rewarded precise use of terminology and correct application of economic principles.

2. Application (AO2)

- Students were expected to apply their knowledge to specific contexts, such as data extracts, case studies, or real-world examples.
- Effective application involved interpreting data, using diagrams appropriately, and relating concepts to the scenario provided.
- Markers looked for relevance and the ability to connect theory with context.

3. Analysis and Evaluation (AO3)

- The most crucial component, especially for higher marks.
- Students needed to analyze causes, effects, and implications.
