At its core, job satisfaction is a multifaceted construct that encompasses various aspects of work life. It involves how employees feel about their roles, responsibilities, colleagues, management, work environment, and compensation. Several definitions have been proposed by researchers over the years, but a common thread remains: job satisfaction reflects an employee's emotional response to their job and the extent to which their job fulfills their needs and desires.

For instance, Locke (1976) defined job satisfaction as "a pleasurable or positive emotional state resulting from the appraisal of one's job or job experiences."
