Students record what they see, hear, or feel during their experiment. Visuals like drawings or charts enhance understanding.

Example:

- Drawings of plants at different stages
- A simple table recording daily growth measurements

4. Results and Findings

This section summarizes what the data shows, often with sentence starters to guide young writers.

Sample sentence starters:

- "I noticed that the plant in the sunlight grew taller."
- "The plant in the dark did not grow much."

5. Conclusion

Students reflect on whether their hypothesis was supported.

Example:

- "My hypothesis was correct. Plants need sunlight to grow because the plant in the dark did not grow."

6. Next Steps or Questions

Encourage curiosity by prompting students to think about what they want to explore next.
